The screenshot shows the '微信卡券查询' (WeChat Card and Coupon Query) interface. On the left is a search table with columns for '姓名' (Name) and '电话' (Phone Number). The table lists four entries for '刘华' (Liu Hua) with different phone numbers. A red arrow points from the first entry to the main card display area. The main area shows a 'Qiangsen Medical Community Hospital Chain' card for '刘华' with a '去刷码' (Go to Scan Code) button. Below this is a '消费明细' (Consumption Details) section showing a '人人康家人健康体检卡券' (Renren Kang Family Health Check Card) for the period 2018.12.20 - 2019.12.20, with a '去使用' (Go to Use) button. A red arrow points from this button to a larger, detailed view of the card on the right. This detailed view shows a barcode, a QR code, the code 'WX470515', and the expiration date '2019-12-20'. A red arrow points from the '去使用' button to this detailed view. Red text annotations provide instructions: 1. Use name or phone number to search for the user. 2. Confirm the user based on the phone number and click the corresponding user record. 3. The right side of the page will display the user's card information. If the user has multiple Qiangsen Medical Cards, please drag the card to switch. 4. The health checkups given by Renren Kang are now displayed in the form of health check coupons. Click 'Go to Use', and when charging for the health checkup, scan or enter this coupon code. A note at the bottom right states: '此券码动态更新，十分钟有效 超期请重新查询' (This coupon code is dynamically updated, valid for 10 minutes. If it expires, please re-query).
